

Tathagat Verma

Incoming Computer Science MS at Stanford University

📧 tathagatv.github.io | **in** [tathagatv](#) | **tw** [verma.tathagat](#) | **o** [tathagatv](#) | **✉** tathagatswagverma@gmail.com

EDUCATION

Indian Institute of Technology Bombay, Mumbai, India

July 2018 - May 2022

BTech. in Computer Science and Engineering with Honors

CPI - **9.64/10**

Interests: Deep Generative Models, Graph Neural Networks, Medical Image Processing, Natural Language Processing, Early Stage Startups

SCHOLASTIC ACHIEVEMENTS

- Secured **All India Rank 53** in **JEE Advanced** out of 200,000 candidates 2018
- Secured **All India Rank 34** in **JEE Main** out of 1.2 million candidates 2018
- Recipient of the **Quadeye Excellence Scholarship**, awarded on the basis of academic achievements 2021
- Amongst top **30** in India selected for the **International Astronomy Olympiad** Selection Camp 2018
- Amongst top **35** in India selected for the **International Mathematical Olympiad Training Camp** 2017
- Awarded **Advanced Performer (AP)** grade in **3** courses for exceptional performance 2018-21
- Amongst top 300 students selected for the **Indian National Physics and Chemistry Olympiads** 2018
- Recipient of the **Kishore Vaigyanik Protsahan Yojana (KVPY)** fellowship by **Govt. of India** 2017

PUBLICATIONS

1. Title: **VarScene: A Deep Generative Model for Realistic Scene Graph Synthesis** [\[paper\]](#)
Authors: **Tathagat Verma**, Abir De, Yateesh Agrawal, Vishwa Vinay, Soumen Chakrabarti
Conference: International Conference on Machine Learning (ICML) 2022

RESEARCH EXPERIENCE

VarScene: A Deep Generative Model for Realistic Scene Graph Synthesis

Autumn 2021

Guides: [Prof. Soumen Chakrabarti](#), [Prof. Abir De](#) | *R&D Project*

InfoLab, IIT Bombay

- Developed a deep generative model for novel scene graph synthesis using **VAE** and **Graph Neural Networks**
- Designed a goal oriented decoder for minimizing the maximum mean discrepancy between graph distributions
- Developed code in **PyTorch** and used the Visual Genome and Visual Relationship Detection datasets
- Significantly outperformed baselines on the Fréchet Inception Distances (**FID**), Inception Scores (**IS**) and achieved better results on the Shortest Path, Weisfeller Lehman and Neighborhood Subgraph Pairwise Distance kernels

Deep Learning for Medical Image Quality Enhancement

Spring 2021, Autumn 2021

Guide: [Prof. Suyash Awate](#) | *R&D Project, Bachelor's Thesis Project*

IIT Bombay

- Enhanced the quality of MRI images with sub-sampling and Gaussian noise in the frequency domain and PET images with Poisson noise in the sinogram domain under the weakly-supervised regime
- Trained models using the **RED-CNN** and **UNet** architectures with Bayesian learning in **PyTorch**
- Utilized intermediate VGG-16 layers for **style based losses** and Fourier and Wavelet transform loss functions

INTERNSHIPS

Student Venture Partner

Summer 2022

Venture Highway LLP | Guides: [Aviral Bhatnagar](#), [Akul Jindal](#)

Bengaluru, India

- Gained exposure to sourcing and evaluating **seed stage startups** and interacted with many founders

Image functionality in the Whiteboard Android Application

Summer 2021

Microsoft India (R&D) Pvt. Ltd. | *Software Engineer Intern*

Noida, India

- Integrated **Microsoft Lens SDK** into Whiteboard Android, to support image and OCR tools provided by Lens
- Worked in **Java Android** backend, building the bridge to send images from native Android to the web application
- Developed code in **React** for the web application, making the UI component for triggering image workflow

Attribute Value Extraction from Product Descriptions

Summer 2020

Coupa Software India Pvt. Ltd. | *Data Science Intern*

Pune, India

- Developed unsupervised and semi-supervised methods for extracting attribute values from product descriptions
- Implemented an **RNN** model for sequence tagging using **CRF**, **BiLSTM** and attention mechanisms
- Optimized hyper parameters using **Bayesian Optimization**, reducing time required for tuning the model
- Automated taxonomy creation by clustering on co-occurrence graphs using the **Chinese Whispers Algorithm**

Business Monitoring and Alerting Systems

Delta Exchange | Software Engineer Intern

Summer 2019

Mumbai, India

- Made real time predictions for prices of multiple Crypto Derivative contracts by implementing ARIMA model
- Developed a dashboard using **Django** to monitor Business Performances, now being used on a daily basis
- Used **MySQL** database along with APIs and **WebSockets** of various exchanges for obtaining real time data

KEY TECHNICAL PROJECTS

Blockchain Simulation and Applications

Guide: *Prof. Vinay Ribeiro* | *Blockchains, Cryptocurrencies and Smart Contracts*

Autumn 2021

Course Project

- Implemented a peer-to-peer cryptocurrency network simulation in **C++** following the **Bitcoin** protocols
- Simulated selfish and stubborn mining attacks, analyzing the effects of hash power and network connectivity
- Developed a decentralized payment application on top of **Ethereum** in Solidity, utilizing smart contracts

Adversarial Attacks and Robust Deep Learning Models

Guide: *Prof. Sunita Sarawagi* | *Advanced Machine Learning*

Spring 2021

Course Project

- Implemented the L_2 attack, L_∞ attack with first and second order norms and the L_0 Pointwise attack
- Trained 3 robust models using the methods; Analysis by Synthesis, Stability training and Adversarial training
- Developed code in **Keras**, doing a comparative study using the MNIST dataset on all models & across all attacks

Foreshadow Attack and its Variants

Guide: *Prof. Bernard Menezes* | *Advanced Network Security and Cryptography*

Spring 2021

Course Project

- Studied the **Foreshadow** attack and its impact on **Intel SGX** and **VM** systems due to speculative execution
- Simulated the proof-of-concept attack on **Linux** kernel with **x86** processor in the absence of Intel TSX

Topical Poetry Generation

Guide: *Prof. Pushpak Bhattacharyya* | *Speech and Natural Language Processing*

Autumn 2020

Course Project

- Developed a program to generate any number of poems on a user supplied topic and rhyme scheme
- Used the CMU Pronunciation Dictionary and **Fasttext** word embeddings to obtain topical rhyming words
- Created **Finite State Acceptors** to accept word sequences following the iambic pentameter stress pattern
- Extracted fluent poems from the FSA with **RNN** language models trained on the Gutenberg Poetry Corpus

Route Optimization Algorithm

Inter IIT Technical Meet

Winter 2019

IIT Roorkee

- Proposed solution for the Vehicle Scheduling Problem in the setting of buses, winning **gold** medal among 20 teams
- Reduced the problem to multiple instances of the Travelling Salesman Problem(**TSP**) using k -means clustering
- Generated routes while taking real time traffic into account using **Google Maps APIs** in Python

OTHER PROJECTS

E-Commerce Recommender System

Guide: *Prof. Umesh Bellur* | *Database Management*

Spring 2021

Course Project

- Built an E-Commerce recommendation website using **Neo4j** graph database and **Node.js** runtime environment
- Included the features of user history, trending products and text similarity metrics to generate recommendations

Compiler for C-like Language

Guide: *Prof. Uday Khedker* | *Implementation of Programming Languages*

Spring 2021

Course Project

- Built compiler for a C-like language, constructing Three Address Code and Register Transfer Language incrementally
- Implemented the scanner in **lex**, parser in **yacc** and conversion of abstract syntax tree to TAC and RTL in **C++**

Medical Image Segmentation using Deep Learning models

Guide: *Prof. Suyash Awate* | *Medical Image Computing*

Spring 2020

Course Project

- Performed segmentation of neuronal structures from electron microscopy images on the ISBI 2012 dataset
- Implemented and trained the **Deep Multilevel Contextual Network** and **U-Net** models with variations

Portal for Selecting and Evaluating Teaching Assistants

Undergraduate Academic Council

Autumn 2019

IIT Bombay

- Revamped the selection portal for Teaching Assistants being used in the Institute by faculty and students
- Developed a **full-stack** application with backend in Django, MySQL DB and frontend with HTML and JavaScript

Splitwise Clone Web Application

Guide: *Prof. Amitabha Sanyal* | *Software Systems Lab*

Autumn 2019

Course Project

- Built a **Django** web app to automate addition and splitting of bills among stakeholders, similar to **Splitwise App**
- Designed a database in **MySQL** for efficiently implementing features like settling up expenses from all groups
- Provided statistical insights on the type of expenditures made by users, using **JavaScript** and **Highcharts**

TECHNICAL SKILLS

Programming	C++, Python, C, Java, Bash, Solidity, Racket, SQL, MATLAB
Packages	PyTorch, TensorFlow, Keras, NLTK, SciPy, Pandas, Statsmodels, NumPy
Software	Git, L ^A T _E X, AutoCAD, SOLIDWORKS, Android Studio
Web Development	HTML, CSS, JavaScript, Django, Bootstrap

RELEVANT COURSES

Artificial Intelligence: Foundations of Intelligent and Learning Agents; Machine Learning Theory and Methods; Medical Image Computing; Advanced Machine Learning; Speech and Natural Language Processing; Artificial Intelligence and Machine Learning; Data Analysis and Interpretation

Security: Introduction to Blockchains, Cryptocurrencies and Smart Contracts; Advanced Network Security and Cryptography; An Introduction to Number Theory and Cryptography

Computer Science: Automata Theory; Implementation of Programming Languages; Computer Architecture; Operating Systems; Database and Information Systems; Computer Networks; Data Structures and Algorithms; Digital Logic Design

Mathematics: Calculus; Linear Algebra; Differential Equations; Introduction to Numerical Analysis

LEADERSHIP POSITIONS

Institute Student Mentor

Jun 2021 - Jun 2022

Student Mentorship Program

IIT Bombay

- Mentoring **12 freshmen**, helping them adjust to the institute environment, focusing on their holistic development
- Amongst 130 out of over 300 applicants selected through a rigorous procedure of interviews and peer reviews

Senior Department Academic Mentor

Jun 2020 - May 2022

Computer Science and Engineering Department

IIT Bombay

- Mentoring **6 sophomores** of CSE department to assist them in navigating department specific curriculum
- Working in a supportive, facilitative and developmental role for the student community in general as a mentor

Teaching Assistant

IIT Bombay

- **Artificial Intelligence and Machine Learning** | [Prof. Ganesh Ramakrishnan](#) Jul 2021 - Nov 2021
- **Data Structures and Algorithms** | [Prof. Sharat Chandran](#) Jan 2021 - May 2021
- **Logic for Computer Science** | [Prof. Krishna S](#) Jul 2020 - Nov 2020

Responsible for conducting doubt sessions, preparing problem sets, programming labs and grading examinations

Organiser in Corporate Relations

Nov 2018 - Mar 2019

Entrepreneurship Cell

IIT Bombay

- Responsible for speaker handling and handling overall logistics in multiple events
- Part of the execution team for **The Panel Discussion** at Entrepreneurship Summit, 2019

EXTRACURRICULAR

- Won **gold** medal in Route Optimization Competition at the **Inter IIT Technical Meet, IIT Roorkee** 2019
- Represented IIT Bombay at the **34th Inter IIT Aquatics Meet, IIT Guwahati** 2018
- Awarded **second** position in **CoDecode** (coding competition) organized by Techfest, IIT Bombay 2020
- Covered a distance of **23.2 km** swimming continuously for **12 hours** at Swimathon, IIT Bombay 2019
- Awarded Certificate of Merit for **winning** the Inter Department Football Tournament IIT Bombay 2019
- Awarded Diploma Certificate for competing in the **Gothia Football Cup, Gothenburg, Sweden** 2011
- Completed 2 levels of graded examination in communication skills from **Trinity College London** 2013
- Phonathon: Pitched to 50 alumni the events conducted by Student Alumni Relations Cell, IIT Bombay 2019
