Tathagat Verma

Incoming Computer Science MS at Stanford University

🔾 tathagatv.github.io | in tathagatv | 💆 verma_tathagat | 🔾 tathagatv | 🖂 tathagatswagverma@gmail.com EDUCATION Stanford University, Stanford, USA Sep 2022 - May 2024 (expected) Master of Science in Computer Science, Specialization - Artificial Intelligence Indian Institute of Technology Bombay, Mumbai, India Jul 2018 - May 2022 CPI - 9.64/10 Bachelor of Technology in Computer Science and Engineering with Honors SCHOLASTIC ACHIEVEMENTS • Secured All India Rank 53 in JEE Advanced out of 200,000 candidates 2018 • Secured All India Rank 34 in JEE Main out of 1.2 million candidates 2018 • Recipient of the Quadeye Excellence Scholarship, awarded on the basis of academic achievements 2021 Amongst top 30 in India selected for the International Astronomy Olympiad Selection Camp 2018 • Amongst top 35 in India selected for the International Mathematical Olympiad Training Camp 2017 • Amongst top 300 students selected for the Indian National Physics and Chemistry Olympiads 2018 • Recipient of the Kishore Vaigyanik Protsahan Yojana (KVPY) fellowship by Govt. of India 2017 Publications 1. Title: VarScene: A Deep Generative Model for Realistic Scene Graph Synthesis [paper] Authors: Tathagat Verma, Abir De, Yateesh Agrawal, Vishwa Vinay, Soumen Chakrabarti Conference: International Conference on Machine Learning (ICML) 2022 Research experience VarScene: A Deep Generative Model for Realistic Scene Graph Synthesis Autumn 2021 Guides: Prof. Soumen Chakrabarti, Prof. Abir De | R&D Project InfoLab, IIT Bombay • Developed a deep generative model for novel scene graph synthesis using VAE and Graph Neural Networks • Designed a goal oriented decoder for minimizing the maximum mean discrepancy between graph distributions • Developed code in **PyTorch** and used the Visual Genome and Visual Relationship Detection datasets • Significantly outperformed baselines on the Fréchet Inception Distances (FID), Inception Scores (IS) and achieved better results on the Shortest Path, Weisfeller Lehman and Neighborhood Subgraph Pairwise Distance kernels Deep Learning for Medical Image Quality Enhancement Spring 2021, Autumn 2021 Guide: Prof. Suyash Awate | R&D Project, Bachelor's Thesis Project IIT Bombay • Enhanced the quality of MRI images with sub-sampling and Gaussian noise in the frequency domain and PET images with Poisson noise in the sinogram domain under the weakly-supervised regime • Trained models using the RED-CNN and UNet architectures with Bayesian learning in PyTorch • Utilized intermediate VGG-16 layers for style based losses and Fourier and Wavelet transform loss functions INTERNSHIPS Student Venture Partner Summer 2022 Venture Highway LLP | Guides: Aviral Bhatnagar, Akul Jindal Bengaluru, India

· Gained exposure to sourcing and evaluating seed stage startups and interacted with many founders

Image Functionality in the Whiteboard Android Application

Summer 2021 Noida, India

Microsoft India (R&D) Pvt. Ltd. | Software Engineer Intern

- Integrated Microsoft Lens SDK into Whiteboard Android, to support image and OCR tools provided by Lens
- Worked in Java Android backend, building the bridge to send images from native Android to the web application
- Developed code in **React** for the web application, making the UI component for triggering image workflow

Attribute Value Extraction from Product Descriptions

Summer 2020

Coupa Software India Pvt. Ltd. | Data Science Intern

Pune, India

- Developed unsupervised and semi-supervised methods for extracting attribute values from product descriptions
- Implemented an RNN model for sequence tagging using CRF, BiLSTM and attention mechanisms
- Optimized hyper parameters using **Bayesian Optimization**, reducing time required for tuning the model
- Automated taxonomy creation by clustering on co-occurrence graphs using the Chinese Whispers Algorithm

Business Monitoring and Alerting Systems

Summer 2019

Delta Exchange | Software Engineer Intern

- Mumbai, India
- Made real time predictions for prices of multiple Crypto Derivative contracts by implementing ARIMA model
- Developed a dashboard using **Django** to monitor Business Performances, now being used on a daily basis
- Used MySQL database along with APIs and WebSockets of various exchanges for obtaining real time data

Technical projects

Blockchain Simulation and Applications

Autumn 2021

Guide: Prof. Vinay Ribeiro | Blockchains, Cryptocurrencies and Smart Contracts

Course Project

- Implemented a peer-to-peer cryptocurrency network simulation in C++ following the Bitcoin protocols
- Simulated selfish and stubborn mining attacks, analyzing the effects of hash power and network connectivity
- Developed a decentralized payment application on top of Ethereum in Solidity, utilizing smart contracts

Adversarial Attacks and Robust Deep Learning Models

Spring 2021

Guide: Prof. Sunita Sarawagi | Advanced Machine Learning

Course Project

- Implemented the L_2 attack, L_{∞} attack with first and second order norms and the L_0 Pointwise attack
- Trained 3 robust models using the methods; Analysis by Synthesis, Stability training and Adversarial training
- Developed code in Keras, doing a comparative study using the MNIST dataset on all models & across all attacks

Foreshadow Attack and its Variants

Spring 2021

Guide: Prof. Bernard Menezes | Advanced Network Security and Cryptography

Course Project

- Studied the Foreshadow attack and its impact on Intel SGX and VM systems due to speculative execution
- Simulated the proof-of-concept attack on Linux kernel with x86 processor in the absence of Intel TSX

Topical Poetry Generation

Guide: Prof. Pushpak Bhattacharyya | Speech and Natural Language Processing

Course Project

- Developed a program to generate any number of poems on a user supplied topic and rhyme scheme
- Used the CMU Pronunciation Dictionary and Fastext word embeddings to obtain topical rhyming words
- Created Finite State Acceptors to accept word sequences following the iambic pentameter stress pattern
- Extracted fluent poems from the FSA with RNN language models trained on the Gutenberg Poetry Corpus

Route Optimization Algorithm

Winter 2019

Inter IIT Technical Meet

IIT Roorkee

- Proposed solution for the Vehicle Scheduling Problem in the setting of buses, winning gold medal among 20 teams
- Reduced the problem to multiple instances of the Travelling Salesman Problem (TSP) using k-means clustering
- Generated routes while taking real time traffic into account using Google Maps APIs in Python

TECHNICAL SKILLS

C++, Python, C, Java, Bash, Solidity, Racket, SQL, MATLAB **Programming**

Packages PyTorch, TensorFlow, Keras, NLTK, SciPy, Pandas, Statsmodels, NumPy

Git, IATEX, AutoCAD, SOLIDWORKS, Android Studio Software

Web Development HTML, CSS, JavaScript, Django, Bootstrap

Leadership Positions

Institute Student Mentor

Jun 2021 - Jun 2022

Student Mentorship Program

IIT Bombay

- Mentoring 12 freshmen, helping them adjust to the institute environment, focusing on their holistic development
- Amongst 130 out of over 300 applicants selected through a rigorous procedure of interviews and peer reviews

Senior Department Academic Mentor

Jun 2020 - May 2022

Computer Science and Engineering Department

IIT Bombay

- Mentoring 6 sophomores of CSE department to assist them in navigating department specific curriculum
- Working in a supportive, facilitative and developmental role for the student community in general as a mentor

Teaching Assistant

IIT Bombay

IIT Bombay

- Artificial Intelligence and Machine Learning | Prof. Ganesh Ramakrishnan Jul 2021 - Nov 2021
- Data Structures and Algorithms | Prof. Sharat Chandran

Jan 2021 - May 2021

• Logic for Computer Science | Prof. Krishna S

Jul 2020 - Nov 2020

Responsible for conducting doubt sessions, preparing problem sets, programming labs and grading examinations

Organiser in Corporate Relations

Nov 2018 - Mar 2019

Entrepreneurship Cell

• Responsible for speaker handling and handling overall logistics in multiple events

• Part of the execution team for The Panel Discussion at Entrepreneurship Summit, 2019

EXTRACURRICULAR

• Won gold medal in Route Optimization Competition at the Inter IIT Technical Meet, IIT Roorkee 2019

• Represented IIT Bombay at the 34th Inter IIT Aquatics Meet, IIT Guwahati

2018

• Awarded **second** position in **CoDecode** (coding competition) organized by Techfest, IIT Bombay

2020

• Covered a distance of 23.2 km swimming continuously for 12 hours at Swimathon, IIT Bombay

2019

Awarded Certificate of Merit for winning the Inter Department Football Tournament IIT Bombay

2019

• Awarded Diploma Certificate for competing in the Gothia Football Cup, Gothenburg, Sweden

2011

• Phonathon: Pitched to 50 alumni the events conducted by Student Alumni Relations Cell, IIT Bombay 2019
